

Choosing the Right Ice Maker

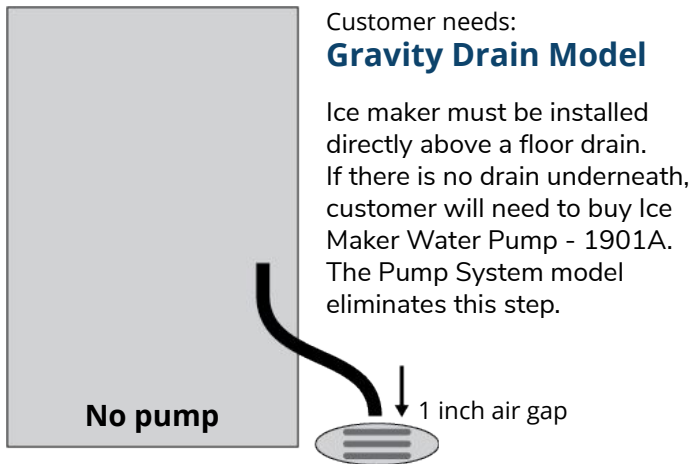

Match the right ice maker with your customer's home infrastructure. Ask your customer where their drain is in relation to where their ice maker will be installed. Following the key knowledge below will help ensure your customer gets an ice maker that meets their needs.

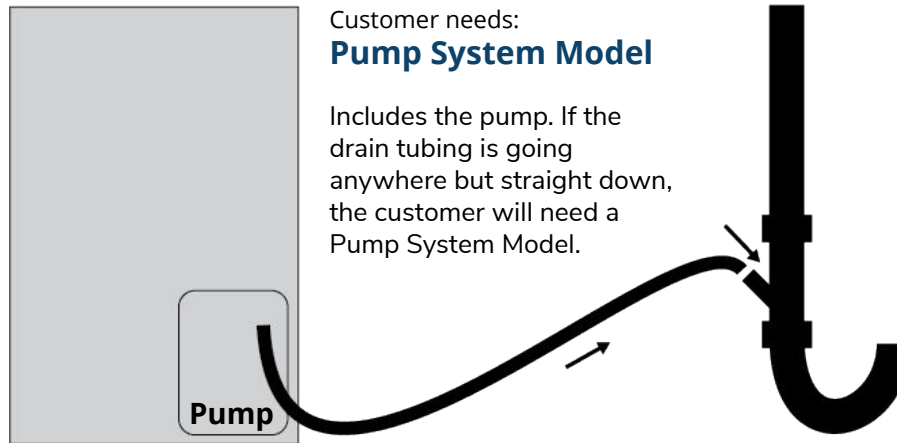

Whirlpool® and KitchenAid® Ice Makers come in two styles: **Gravity Drain** and **Pump System**. Pump system models include a pump.

Where will the customer be installing the ice maker?

Directly above a floor drain

No floor drain. Will use under-sink drain
