

PRESERVA[®]

FOOD CARE SYSTEM

The Preserva[®] Food Care System brings the benefits of dual evaporators to our most popular freestanding refrigerator configurations. Whether your customers want the unprecedented flexibility of a 5-door refrigerator,

the stylish appeal of our French door refrigerators or the classic convenience of a side-by-side refrigerator, this innovative technology helps fresh and frozen food retain their fresh-picked flavor and texture.

SEQUENTIAL DUAL EVAPORATORS

Independent cooling systems allow for two kinds of cooling. Refrigerated food gets the high humidity needed to keep it fresher longer. And inside the freezer, the air stays cold and dry to minimize freezer burn.

PRODUCE PRESERVER

An ethylene-absorption cartridge helps delay over-ripening. Ethylene gas is produced by certain fruits and vegetables which should be stored separately from ethylene-sensitive items.

FRESHFLOW™ AIR FILTER

The activated carbon filter is 15 times more powerful than baking soda at reducing common food odors, which helps keep odors that can spoil fresh flavor (e.g. garlic, onions or seafood) from transferring between foods.
