DID YOU KNOW?

The use and care guide recommends cookware about the same size as the element cooking area. It should not extend more than 1/2" (1.3 cm) outside the area. Selecting cookware that is too small for an element allows excess heat to escape, while cookware that is too large is non conductive to even cooking.

DEMO

Show off the flexibility of the FlexHeat™ Dual Radiant Element by placing different sized pots and pans on the cooktop. Let your customers know that the FlexHeat™ Dual Radiant Element combines two element sizes in one to fit both small and large cookware.
