AMANA OVER-THE-RANGE MICROWAVE

Model No. AMV6507RGS

1,000 watts | Capacity 1.9 cu. ft.

AVAILABLE COLORS

GOT A CRAVING BUT DON'T WANT TO LEAVE THE COUCH FOR TOO LONG?

Our built-in microwaves let you cook between commercial breaks or reheat last night's takeout, so you never miss a minute of your favorite TV show. Amana®. Just Right.

SENSOR COOKING

ASK: How do you decide your microwave cooking time?

SHARE: Sensor Cooking automatically adjusts the cook time, so you can spend less time on guesswork and more time catching up with the season premiere.

HOW IT WORKS: A sensor in the microwave oven detects moisture released from food as it heats, and adjusts the cooking time accordingly, giving you great results with less guesswork.

STEAM COOKING

ASK: Tell me about a time you steamed a dish, such as vegetables?

SHARE: If you're in the mood for something light, Steam Cooking lets you cook rice, fish or veggies right in the microwave with our optional steam vessel.

POPCORN OPTION

ASK: How often do you enjoy popcorn?

SHARE: There's no better way to settle in for movie night when you can get popcorn at just the push of a button. The Popcorn option utilizes the microwave's sensor to provide great results with the push of a button.
