Available colors

S | Stainless Steel

Mircowave Convection and Crisp technology

ASK: Have you ever thought about using your microwave as a second oven?

SHARE: Conveniently cook favorite recipes even faster,** and with the same home-cooked results, right in the microwave. This microwave has 3 heat sources which include a 1600 watt grill element, a 1600 watt convection element and a 900 watt microwave. This technology allows you to cook faster without sacrificing results. The grill element allows you to grill and brown just like a broil element. This model provides the same benefits as a double oven.

True Convection Cooking

ASK: What types of food do you regularly bake?

SHARE: Our convection system features an X shaped baffle over the rear fan and heating element which distributes the hot air above, below and around the food. The convection fan and additional heating element allow the customer to cook food faster. ***This model also includes convection conversion which helps convert recipe time or temperature for the customer.

Digital Meat Thermometer

ASK: Do you ever feel like you have to babysit your oven to make sure your food is done the way you like it? Do you ever stay away from meats that need a precise temperature?

SHARE: The digital meat thermometer automatically monitors the internal temperature of food, then alerts you and shuts off the oven when food is fully cooked, so you never have to guess at the doneness of your meal.
