LARGE OVEN CAPACITY WITH EXTRA-LARGE OVEN WINDOW

ASK: How many dishes do you usually cook in the oven at the same time?

SHARE: With 4.8 cubic feet you will have enough room to fit both the lasagna and the pie, so you can whip up dinner and dessert at the same time. The extra-large oven window allows you to see the food cook so you won't need to open and close the door to check on the food.

VERSATILE COOKTOP

ASK: What type of food do you typically make on your cooktop?

SHARE: Multiple element options let you cook more of your favorites at the same time. 6-inch coils are perfect for warming up your favorite package of instant noodles. You can use 8-inch coils to serve larger meals. The 8-inch coil elements feature 2100 watts of cooking power for foods like pasta or chili.

STORAGE DRAWER

SHARE: This storage drawer comes with plenty of space to put those pots and pans out of sight and out of mind.
