Dimensions: h: 42.875" w: 27.125" d: 26.5"

Colors: ☐ White

START THE CONVERSATION

Does your washing machine lid ever slam shut?

TOP FEATURES

1

SLOW-CLOSE GLASS LID

Keep track of the action inside your washer with the Slow-Close Glass Lid. It offers a clear view of laundry and closes softly without slamming.

2

COLD WASH CYCLE

Keep it cool with the Cold Wash Cycle and use cold water to save energy and help prevent damage to sensitive fabrics.

3

LARGE CAPACITY

Large Capacity can help you take on every load, so go ahead, wash those towels.

DID YOU KNOW?

Glass lids on washers were first introduced by Whirlpool Corporation in the early 2000s as a premium feature, and quickly became popular among consumers due to their stylish appearance and ability to provide visibility into the wash cycle.

HOW TO DEMONSTRATE

SLOW-CLOSE GLASS LID

Have your customer open the lid and gently let it go. Tell them that the slow close prevents the slamming of fingers and the full width glass is designed to look in during the wash.
