START THE CONVERSATION

Have you ever had to reach to the back to adjust the temperature on a freezer?

TOP FEATURES

1

UP-FRONT TEMPERATURE CONTROL SYSTEM

Easily change temps when you need with the Temperature Control System on the front of the unit.

2

LED INTERIOR LIGHTING

LED Interior Lighting spotlights the contents of your freezer while still using less energy than traditional bulbs.

3

COUNTERBALANCED LID

The easy-to-open Counterbalance Lid stays open to help when your hands are full.

DID YOU KNOW? Temperature controls at the front can make provide a less complicated experience for the customer

HOW TO DEMONSTRATE

UP-FRONT TEMPERATURE CONTROL SYSTEM

Point to the temperature controls on the front and show the customer how to adjust the temperature
