Dimensions: h: 17.875" w: 30" d: 12.75"

Colors:  Black Ore  Juniper  PrintShield Stainless

START THE CONVERSATION

Thinking about your current kitchen design, do you have a countertop air fryer?

TOP FEATURES

1

AIR FRY MODE

Air Fry Mode replaces a countertop air fryer for all of the crisping with none of the clutter. Triple heating elements and a fan circulate hot air around the included air fry basket to crisp and brown food with less oil.*

2

MULTIFUNCTION OVEN MODES

Multifunction Oven Modes replace a convection or toaster oven, freeing up counter space by elevating baking, roasting, broiling and toasting. Triple heating elements and a fan direct heat where it's needed to cook at temperatures up to 450°.

3

INFRARED SENSOR MODES

Infrared Sensor Cooking Modes provide intuitive assistance to smoothly melt chocolate, gently soften butter, defrost frozen ingredients without cooking the edges and help prevent splatters. Infrared sensors monitor cooking progress and automatically adjust cook time and temperature as needed.

DID YOU KNOW?

The primary benefit of air frying is reduced use of oil, which can help to cook meals that are lower in fat and calories vs. traditional deep frying. (KitchenAid.com)

HOW TO DEMONSTRATE

AIR FRY MODE

Remove the included Air Fry Basket from the microwave demonstrating how the hot air circulates around the air fry basket. Then show customers there are three positions to place it in the microwave. The right position will help cook food in a good performance. Depending on their recipe, we recommend they visit the online Control Guide for good placement.
