DID YOU KNOW?

The primary benefit of air frying is reduced use of oil, which can help to cook meals that are lower in fat and calories vs. traditional deep frying. (KitchenAid.com)

HOW TO DEMONSTRATE

AIR FRY MODE

Remove the included Air Fry Basket from the microwave demonstrating how the hot air circulates around the air fry basket. Then show customers there are three positions to place it in the microwave. The right position will help cook food in a good performance. Depending on their recipe, we recommend they visit the online Control Guide for good placement.
