What ingredients do you like to keep at just the right temperature?

TOP FEATURES

1

EXTENDFRESH™ TEMPERATURE MANAGEMENT SYSTEM

The ExtendFresh™ Temperature Management System features a single evaporator design that is enhanced by independent temperature controls inside the refrigerator and freezer to help ensure optimal storage of fresh and frozen food. When the interior thermistors detect a temperature change inside the refrigerator, a baffle opens allowing cold air to enter the refrigerator

2

INTERIOR WATER DISPENSER

The Interior Water Dispenser provides easy access to filtered water inside the refrigerator. Encourage customers to replace their filter every 6 months for maximum contaminant reduction(1) and great taste.

3

PRODUCE PRESERVER

Many fruits and vegetables emit ethylene gas, which causes them to over-ripen. The Produce Preserver removes ethylene gas to help extend freshness.*

*Based on commonly purchased produce

DID YOU KNOW?

According to the US Food and Drug Administration, For food safety, refrigerators should be set to maintain a temperature of 40 °F or below.* That's why KitchenAid brand refrigerators are designed with technology that helps ensure optimal storage of fresh and frozen food....

HOW TO DEMONSTRATE

EXTENDFRESH™ TEMPERATURE MANAGEMENT SYSTEM

Point out vents or baffles between the sections. Tell customers how air is exchanged between fresh and frozen compartments to keep temperatures level.
