## TOP FEATURES

1

### EXTENDFRESH™ TEMPERATURE MANAGEMENT SYSTEM

The ExtendFresh™ Temperature Management System features a single evaporator design that is enhanced by independent temperature controls inside the refrigerator and freezer to help ensure optimal storage of fresh and frozen food. When the interior thermistors detect a temperature change inside the refrigerator, a baffle opens allowing cold air to enter the refrigerator

2

### INTERIOR WATER DISPENSER

The Interior Water Dispenser provides easy access to filtered water inside the refrigerator. Encourage customers to replace their filter every 6 months for maximum contaminant reduction(1) and great taste.

3

### PRODUCE PRESERVER

Many fruits and vegetables emit ethylene gas, which causes them to over-ripen. The Produce Preserver removes ethylene gas to help extend freshness.\*
