What types of ingredients do you use in your recipes?

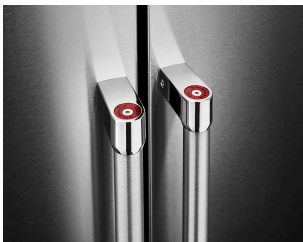

TOP FEATURES

1

PRESERVA® FOOD CARE SYSTEM

Dual evaporators, a produce preserver and an air filter work together to enhance food preservation and minimize odors. Dual evaporators provide a dedicated refrigeration and freezer unit to help keep food fresh longer. A produce preserver absorbs ethylene gas to delay over-ripening(1). And the air filter reduces common food odors.

2

PRINTSHIELD™ FINISH

Resist smudges and fingerprints with PrintShield™ Finish. This easy-to-clean finish keeps stainless steel appliances looking great with just water and a soft cloth. Be sure to tell customers how this specialized coating will allow them to spend more time cooking the meals they love, and less time cleaning up.

3

IN-DOOR-ICE® SYSTEM

Adds interior room in the freezer with an ice system that mounts on the inside door, allowing for extra freezer shelf space.

DID YOU KNOW?

Sequential dual evaporators change the way air flows through the refrigerator and the freezer. This is a key component to extending the life of fresh and frozen ingredients, particularly produce.

HOW TO DEMONSTRATE

PRESERVA® FOOD CARE SYSTEM

Show off the vents or baffles between the sections and discuss with customers how the air is exchanged between fresh and frozen to keep temperatures level.
