Twice the washer for more control

Customize any load with the **industry's first 2 in 1 Removable Agitator**. Shoppers can now choose between washing with an agitator or an impeller, all in one machine.

- Customers can control how they do laundry with the ability to easily swap the agitator post in or out.
- With two ways to wash, shoppers have the choice and flexibility for certain loads or bulky items that need more space to move.
- Customers can wash each load the way they want with cycle and water fill options—now with a removable agitator.

ASK YOUR CUSTOMER:

**What do you like about a top load washer?
Which features would you keep or change?
Do you prefer an agitator or impeller?**

For customers who are either dissatisfied with their current washer or are undecided between an agitator or impeller, be sure to explain how the **2 in 1 Removable Agitator** gives them the peace of mind of having both options in one washer.

Explain that they have even more control over laundry with features that let them **choose water levels** and **customize wash settings**, both with or without the agitator, to help win the sale.

Dramatization—washing machine does not have a front facing window.
