 White-on-White

START THE CONVERSATION

What foods look less than appetizing based on the lighting in your current refrigerator?

TOP FEATURES

1

LED INTERIOR LIGHTING

Keep food looking as good as it tastes. Light is cast inside the refrigerator so food looks like it's supposed to.

2

SPILLPROOF GLASS SHELVES

Helps contain leaks and spills for easier cleanup. Shelves are easy to see through and can adjust for flexible storage, while maintaining the ability to slow spills from spreading to other parts of the compartment.

3

ADAPTIVE DEFROST

Adaptive Defrost automatically monitors the freezer environment and runs the cycle only when necessary.

DID YOU KNOW?

LEDs, especially ENERGY STAR® rated products, use at least 75% less energy and last 25 times longer than incandescent lighting.(1)

HOW TO DEMONSTRATE

LED INTERIOR LIGHTING

Point out to customers the various locations of the LED lights on the interior. Talk about how the angle of the lights provides a better look for food within the refrigerator. Show off the LED interior lighting by staging the refrigerator with bright colorful food and beverages. Note how these LED bulbs are using less energy and do not need to be replaced over the life of the product.
