What items do you worry about over drying?

TOP FEATURES

1

MOISTURE SENSING

Two sensors increase your dryer's ability to measure moisture and temperature, helping prevent overdrying by automatically stopping the cycle when the load is dry.

2

WRINKLE SHIELD™ OPTION

After the cycle ends, help keep wrinkles from setting into clean, dry fabrics with the Wrinkle Shield™ Option. It keeps clothes tumbling for up to 2.5 hours after the cycle ends or until you open the door.

3

STEAM REFRESH CYCLE

Release wrinkles without rewashing

DID YOU KNOW?

Sometimes the wax from dryer sheets can build up on moisture sensors. Use a damp cloth to refresh the sensor to accurately assess moisture within the drum.

HOW TO DEMONSTRATE

Moisture Sensing

Show customers the moisture sensing strips in the back of the dryer and explain how they can determine how much moisture is still in clothes and adapt drying times to provide the right amount of dry.

ADDITIONAL PRODUCTS TO CONSIDER
